EMERGENCY PROCEDURES

Clear area of all unprotected personnel. If contamination of sewers or waterways has occurred advise local emergency services.

METHODS AND MATERIALS FOR CONTAINMENT AND CLEAN UP

SMALL SPILLS: Avoid accidents, clean up immediately. Sweep or vacuum up, but avoid generating dust. Collect and seal in properly labeled containers or drums for disposal.

LARGE SPILLS: Avoid accidents, clean up immediately. Wear protective equipment to prevent skin and eye contact and breathing in dust. Work up wind or increase ventilation. Cover with damp absorbent (inert material, sand or soil). Sweep or vacuum up, but avoid generating dust. Collect and seal in properly labeled containers or drums for disposal.

7. HANDLING AND STORAGE

PRECAUTIONS FOR SAFE HANDLING

Keep out of reach of children. Avoid skin and eye contact and breathing in dust. Avoid handling which leads to dust formation.

CONDITIONS FOR SAFE STORAGE

Store in a cool, dry, well ventilated place and out of direct sunlight. Store away from sources of heat or ignition. Store away from foodstuffs. Store away from incompatible materials described in Section 10. Keep containers closed when not in use. Check regularly for leaks.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

EXPOSURE STANDARDS:

No value assigned for this specific material by the National Occupational Health and Safety Commission (NOHSC). Exposure Standards for particulates:

Nuisance Dust 8Hr TWA = 10 mg/m3

As published by the National Occupational Health and Safety Commission (NOHSC).

TWA - The time-weighted average airborne concentration over a normal eight-hour working day, for a five-day working week over an entire working life.

These Exposure Standards are guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept to as low a level as is workable. These Exposure Standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

BIOLOGICAL LIMIT VALUES

None allocated.

ENGINEERING CONTROLS:

Ensure ventilation is adequate to maintain air concentrations below Exposure Standards. Avoid generating and breathing in dusts. Use with local exhaust ventilation or while wearing dust mask. Keep containers closed when not in use.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

The selection of PPE is dependent on a detailed risk assessment. The risk assessment should consider the work situation, the physical form of the chemical, the handling methods, and environmental factors.

MANUFACTURE, PACKAGING AND TRANSPORT: Wear clean overalls, safety boots, general purpose gloves (PVC) and safety spectacles. Avoid generating and inhaling dusts. If dust exists, wear dust mask/respirator meeting the requirements of AS/NZS 1715 and AS/NZS 1716. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use.

FOR CONSUMER USE: Avoid contact with eyes. Wash hands after use. Rubber gloves are recommended if handling often.
